SUBJECT: O/RR Project for Coast Guard 25X1A**CONFIDENTIAL**

1. As you requested at your staff meeting on 10 March, I have checked the special intelligence aspects of this with O/RR. Their position is that the material cannot be separated into two bundles since, if this were done, the lesser of the bundles would be practically meaningless. They have been told at some point that Coast Guard cannot receive all-source, and consequently O/RR is marking time until they are told to go ahead on all-source.

2. QUESTION: Do you wish me to tell O/RR to continue their study or to continue to hold it in abeyance until the clearance problems are solved?
